At Bagpress we like to help our customers as much as possible. If we can include offcuts of laminating material and mould making foam with a shipment, without increasing the cost of delivery, then we will always do so as it also helps us reduce the waste from our own manufacturing activities. We also offer free veneer packs to all schools and colleges although there may sometimes be import restrictions that prevent us from doing this to certain worldwide destinations. We also pride ourselves on responding to our customers needs, so if there is any item or material that would like and are having trouble sourcing, then please let us know and we shall try our hardest to help you out. Lastly, we hope that have fun using Bagpress equipment and enjoy the results of your efforts. Vacuum pressing is probably the simplest but most rewarding wood working technique that can easily be taught in schools to students of all ages. From the simple salad server (or back scatcher, depending on your need at the time!) to full size pieces of truely inspirational furniture, they are all possible with a Bagpress
